Anthropic Architect F.

MCP

Resources → UI elements.

Tools → Used by server.

Functions → MCP's implementations.

Prompts → Used by user.

Bedrock + Claude API

Prefilled assistant message: Use to guide Claude in a certain direction, provide a last message of assistant.

Stop sequences: Use to stop claude from generating text after a certain point.

Graders

- Code
- Model
- Human

Evaluation Criteria

- Format
- Valid syntax
- Task following

RAG

Chunking strategies

- Size based
- Structure based
- Semantic based

Text embeddings → Convert text to numbers

→ Hello world = [0.2, 0.399, 0.411, 0.23]

Made with Goodnotes

Extended thinking

- Signature: verifies that the exact text was generated by Claude and was not changed.
- Redacted content: contains the actual thinking text, but in an encrypted form.

Prompt caching

Speeds up Claude's responses and reduces the cost of text generation by reusing from previous requests.

Agents

init

Claude.md
- Project → check into git.
- Local → not checked into git.
- User → Used across all projects.

Claude 101

- Claude capabilities: Claude is an AI assistant that can help with writing, research, coding, problem-solving and more.

Framework and fundations

- Automation: AI does work for you following explicit instructions.
- Augmentation: AI and you work together.
- Agency: AI works independently on your behalf.

4D Framework

- Description
- Delegation
- Diligence
- Discernment

Key takeways

- Effective
- Efficient
- Ethical
- Safe

Diligence → Responsible AI use.

Delegation → Work should be done by AI.

Description → what you want, how you want, how you want it done and how you want to interact.

Discernment → AI outputs, processes, and behaviors to ensure quality and appropriateness.

Made with Goodnotes

Steering long sessions

- Scope → Refine a plan with configs
- Steer → Using commands for example.

/Compact → Summarize your conversation.

/Rewind → Summarize everything before the checkpoint.

/goal → sets a completion condition.

/loop → Run a prompt on an interval.

CLAUDE.md

- Managed Policy → org level file.
- Project → Shared with your team.
- User → Personal preferences across every project on your machine.
- Local → Ignored by git.

CLAUDE.md → for conventions.

Skills → for procedures tied task.

Hooks → for rules that can't be skipped.

/schedule → Create routines
- Routines are in research preview.
- Routines are maxed at 1 hourly.
- Can only push to branches with claude/ prefix.
